QUESTION 3

Alexander a 21-year-old student at Siber University was charged with using modified peer to-peer software to infect computers and create "spiware" – armies of compromised computers numbering from 10,000 to 20,000 machines – that he exploited to obtain credit card and banking information. Once the victims downloaded the software, Alexander gained control of their computers, allowing him to obtain credit card and banking information from the compromised computers. He also used the compromised computers to carry out an Internet attack on an online business in Cyberjaya, Malaysia. The users of those compromised computers were unaware that their computers had been turned into "zombies," they continued to use their computers to engage in online banking and purchases.

Advise the University regarding Alexander's criminal liabilities arising from his actions by referring to the relevant Malaysia Cyberlaws.

QUESTION 4

(a) Rama's dog, Bibi, strayed into his neighbour's garden and accidentally knocked into and broke a vase valued at RM2,000. The angry neighbour detained Bibi in his compound. He refused to return Bibi to Rama unless Rama paid him RM15,000. Rama was anxious about Bibi's safety and promptly paid the neighbour that amount. Bibi was then returned to Rama unharmed. Rama is now unhappy about having made the payment and wishes to know whether there are any grounds under the law of contract on which he could recover the amount of RM15,000 from the neighbour. Advise Rama
